To do list:

Clean up and find citations for EVERY piece of code

- Transitions between foragers/patrollers, etc.

- Foragers

- Patrollers

- Nest maintenance

- Timing (How long before patrollers turn around? How does a tick correspond with realtime)

Put together questions for Deborah Gordon

- Field data

- Specific questions

Continue to improve code using documented sources

- Implement multi-day data

- Using field data and net logo's runner find best values to use.

Put together proper paper.
